

IRWIN Intelligent Bin Systems

Automated alerts keep lines up and running

Keeping your bins full just got a lot easier – and a lot faster. Each IRWIN Intelligent Bin automatically detects inventory levels and instantly sends alerts, eliminating the need for counting trips and "milk runs". That means no more safety stock, no more emergency orders, and more importantly, no more lines down. It's the automated, lean bin solution you've been waiting for.

Maximize profits from every square foot

Waste and inefficiency can hide where you least expect. With IRWIN Intelligent Bin (12B) Systems, you can take control and find new productivity and savings across your entire operation.

Streamline your supply chain

Consolidation of vendors across many possible part categories means fewer orders and expedites, while providing economies of scale, lowering incoming freight costs, improving quality interaction, and increasing trust. You get reduced, but assured, inventory, and space-savings; allowing your organization to optimize your resources, focus on core competencies, and meet strategic goals.

□ Reduce Order Activity

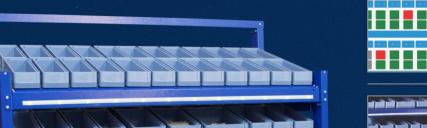

- □ Prompt Low-Stock Notifications
- □ Flexible Configurations
- □ Supply-Base Consolidation
- □ Reduce Inventory

Keep bins full and lines running

I2B Systems eliminate inefficient manual bin counts and stock outs. That keeps production lines and assembly cells non-stop productive – and profitable.

It's time to take control

Discover how IRWIN Intelligent Bin Systems can help you reduce wasted steps, ensure more accurate and less costly processes, and achieve true productivity across your organization.

Cloud-based Software

I2B Systems articulate stock levels though its cloudbased software providing clear visual information from any computer.

Bin Configuration

Lanes and bins are configurable to manage a range of stock items. Up to 72 locations per frame comprised of small, medium and large bins.

Automatic Notification

I2B platform is automatically notified when bins status changes allowing for constant awareness of stock levels.

Visual Feedback

Tri-state LEDs indicate each lane's status, providing instant clear feedback in keeping with visual manufacturing practices.

Bright Lighting

Industrial LED linear fixtures illuminate bins from above providing even lighting of shelves and stock

Frame Dimensions (mm)

702 depth x 2003 height x 1645 width

Bin Dimensions (mm)

300 depth x 90 height x 117 (small); 156 (medium); 234 (large) width

Jp to 10 kg per bin

Dual-bin (Kanban) lanes
