

ENGINEERED COMPONENT SOLUTIONS FOR ALTERNATIVE ENERGY

Richco offers an extensive array of components to meet the needs of numerous applications within the fast growing alternative energy market. Whether it is wind power, solar, or other renewable energy source, if your application requires a custom designed molded component solution, Richco's unparalleled design departments in North America, Europe and Asia coupled with state-of-the-art technology can help take your product from concept to completion.

Popular product categories and types include:

Cable Management

- Steel Clamps
- Cable Clamps
- Spiral Wrap
- Slit Harness Wrap
- Corrugated Tubing
- Wiring & Cable Ducts
- Flexible Channels

Card Guides & Pullers

- Rack Card Guides

Circuit Board Hardware

- Locking Circuit Board Supports
- Miniature Support Posts
- Low Voltage Insulators

Grommets & Bushings

- Blank Diaphragm Grommets
- Push Grommet Hole Plugs
- IP67 Liquid Tight Solutions

Cable Ties & Accessories

- Flat Tie Holders

Rivets

- Snap Rivets

FOR FREE SAMPLES 1-800-621-1892

Wind Power

Application

Control and switching stations

Richco Part Series

LCBS / DLCBS / SR / LMSP

Solar Power

Application

Cable and conduit management

Daughter card and test / configuration

Access hole sealing

Richco Part Series

SPN / DGB / FTH / N

RCGH

BP / PGM

Wire Management

Application

Cable management solutions

Rack and enclosure subsystems

Richco Part Series

HR / SHR / CT

SCD / SRWD / RX / FTH-27 / RKW

Properties

- UV resistant resins
- Anti-fungal additives
