

# STAY-PUT®

## Temporary Retention

### DESCRIPTION:

Stay-Put offers “customized fastener retention solutions” that allow the fastener(s) to be held in place (in most cases without affecting the end assembly) while an operator easily completes the joining process. Call today for an expert “efficiency analysis” by ND’s experienced engineers and see how Stay-Put will ensure the most efficient end product fabrication possible.

### FEATURES:

**Temporary Fastener Retention:** Stay-Put allows the fastener(s) to be held in place while an operator easily completes the assembly process.

**Unit Adhesion:** Stay-Put can also be used like a glue, bonding a number of auxiliary components together.

**Pre-Assembled Auxiliary Components:** Use Stay-Put to combine numerous parts or auxiliary attachments into one easy-to-utilize unit.

## FEATURES (CONTINUED):

**Speeds Assembly:** By combining auxiliary attachments using Stay-Put, the result is a reduction in the quantity of parts involved and less difficulty in the assembly processes.

**Reduces Inventory:** Pre-assembled auxiliary attachments allow the combining of part numbers resulting in less paperwork and the reduction of shipping costs and storage space.

**Reduces Operator Fatigue:** Stay-Put increases overall procedural ergonomics and decreases the number of tasks required to assemble the end product.

**Increases Quality Control:** Stay-Put assures the ease of proper assembly and orientation for pre-assembled fabrication procedures.

Specifications	
Primary Usage	Temporary retention of fasteners and other components
Material	Any one of a selection of polyamides, adhesives, UV curable compounds
Color	Generally dark brown, yellow or translucent

ND Stay-Put is a product of ND Industries, Inc., U.S.A.
